

A close-up photograph of a sewing machine needle and foot, positioned vertically. The needle is threaded with a red thread. The foot is a standard sewing machine foot, and the needle is currently stitching a piece of light-colored fabric. The background is a soft, out-of-focus light blue. The image is framed by a white border with small black corner marks.

Preamble

In many countries throughout the world, sheltered employment is expanding with the objective of offering short to long term employment to persons with disabilities who wish to participate in the economy. In South Africa, the government's national agenda on the active participation in the economy of the country by people with disabilities is in line with international initiatives and best practice. The ratified ILO United Nations' Convention on the Rights of People with Disabilities sets out guidelines for an inclusive approach to employment, education and active participation in society.

History

The Sheltered Employment Factories (SEF) was established in 1943 to

provide employment opportunities for people with disabilities who were unable to secure employment in the labour market due to market conditions preventing the accessibility of equal employment for people with disabilities. The establishment of the factories immediately after the Second World War was a conscious decision by the government to create an environment that provides work for persons with disabilities. At the time many countries relied on the medical approach to addressing issues of disability, and this shaped the strategies and operations of the factories.

The Department of Labour inherited the SEF from the previous Government post 1994 and has since 2007 taken a bold step of embarking on a turnaround strategy that is aimed at converting the SEF into sustainable viable entities. The turnaround strategy in the form of the Business Case was approved in 2013, and implementation has since commenced.

The SEF Now

Historically the SEF were the major supplier of furniture to government and state aided institutions as the sole supplier of linen and garments to hospitals and learner furniture to schools. Regrettably this status has been removed and the SEF now competes with the private sector with inevitable loss of business and consequent job opportunities for the people we employ.

In 2012 the Department of Basic Education contracted the SEF to manufacture school furniture and to date we have manufactured and delivered over 27 000 different school furniture items in the Eastern Cape, and over 78 000 combination desks in Limpopo and Mpumalanga with at least 5 200 teachers desks and chairs. The Western Cape Department of Health and Education have been supporting the SEF for over a decade. The Future

The Employment Services Act 4, of 2014 makes provision of the establishment of Supported Employment Enterprises. The legal status of the SEE will be conferred by the Employment Services Act (No 4 of 2014), Chapter 6 section 42(1) by making provision for the Establishment of Supported Employment Enterprises (SEE) as a national government component contemplated in section 7A of the Public Service Act, 1994 (Proclamation No. 103 of 1994), to promote work and employment opportunities for persons with disabilities. This will replace the current Sheltered Employment Factories (SEF) which was established through a cabinet memorandum.

Functions of Supported Employment Enterprises

- a) Facilitate supported employment;
- b) Provide work opportunities for persons with disabilities;

- c) develop and implement programmes that promote the employability of persons with disabilities, including persons with permanent disablement as defined in the Compensation for Occupational Injuries and Diseases Act, 1993 (Act No. 130 of 1993), in the light of their evolving needs in a changing economy; and perform any other functions may be prescribed by the Minister.
